

6.0 Updating Mii Channel

Mii Channel Updater is a homebrew that allows you to update your Mii Channel. The principle is simple, it connects to the Nintendo Update Servers and download the latest version of the Mii Channel. After, the Mii Channel settles while replacing the old version. Miis are not deleted and will be available after updating your Mii Channel. Here is the process by the homebrew :

- 1.0 Launch the homebrew and select Yes.
- 2.0 Downloading the latest Mii Channel.
- 3.0 Installing the latest Mii Channel in your Wii.
- 4.0 It's finish ! Press any button to quit.
